

ENiTO™

Green Building Sustainable Palm Flooring

*Founding Member
from the US Green Building Council
(USGB)*

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System™ encourages and accelerates global adoption of sustainable green building.

Over the past several years, “sustainability” has become an important attribute of many new buildings—commercial and residential. The U.S. Green Building Council (USGBC), in partnership with other organizations, has developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System™.

The LEED Green Building Rating will help professionals to improve the quality of

buildings and their impact on the environment. ENITO offers products that are functional, cost-effective and have no harmful effects for humans or the environment. We strive to make a difference by committing to environment sustainability.

ENITO Palm Wood Flooring contribute to or Comply with LEED Credit. By opting for our ECO-Friendly ENITO Palm Wood Collection, you too can make a difference.
